Residential Commercial Custom made FRP Planters

WHY TO CHOOSE GURU FRP PLANTERS

LIGHTWEIGHT

Guru Group's fiberglass plant pots are incredibly lightweight. The fiberglass fibers and resin at the right consistency create a planter structure that is easy to move even in extra large dimensions.

WEATHER-RESISTANT

Quality finishes on fiberglass planters ensure they are able to withstand harsh weather conditions during spring, summer, fall and winter. Snow, sleet, rain, and excessive sunshine are no match to a fiberglass planter's durability.

UV RESISTANT

Guru Group's planter paired with an automotivegrade finish will resist cracks and fading colors from UV rays. This type of finish keeps fiberglass planters looking fresh despite any harsh sunlight.

LOW MAINTENANCE

Guru Group's planters require very little maintenance. They can be left without care for a significant amount of time in both indoor and outdoor conditions. However, an occasional cleaning and wax can help to keep them looking their best.

DURABILITY

Guru Group's planters are made to last. Whether placed indoors or outdoors, fiberglass plant containers are able to withstand adverse weather, foot traffic, UV rays and more while offering an attractive foundation to plant designs.

COLOR PALETTE AVAILABILITY

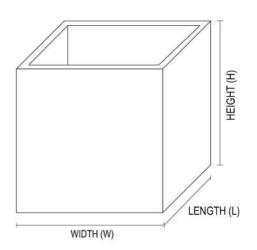

Match any interior or exterior design with a wide selection of standard available colors. If you need to match a particular color scheme, some companies specialize in offering custom painted planters to match a RAL color code.

DARK GREY CONCRETE CODE: DGCF001

LIGHT GREY SPOTTED CONCRETE CODE: DGCF001

WARRANTY

Guru Group's stands by the quality of its fiberglass planters.

Each planter holds a three (3) year warranty from the time of acceptance of the product.

Guru Groups Bengaluru LLP., warrants the initial purchaser of its products that they are

of quality material and workmanship, and are free from manufacturing defects.

Guru Groups Bengaluru LLP., at its sole discretion, will repair, exchange or give credit

for the original purchase price of any item providing to be of defective materials or

workmanship.

Mishandling, misuse, abuse, failure to follow directions for use, unauthorized modifications, neglect, accidents or any other hazard to the product voids the three

year warranty. Your planters are finished with an automotive paint that offers many

advantages including UV resistance and can withstand extreme conditions. While our top coat paint used is very durable, storing planters in wet or steamy cartons or

standing water can cause damage to the finish. Normal use allowing water to immediately drain off the finish after installation will not cause any harm.

Each order confirmation comes with handling and planting instructions to ensure the longevity of your planter. It is highly encouraged to follow these instructions for

the best use of Guru Groups's FRP planters.

Please note that is the responsibility of the purchaser to ensure that water be able

to drain sufficiently from the containers with outdoor use. This is notably important

In regions that are subjected to freezing conditions.

Terms of the offer

- 1. The prices quoted in this Catalogue are exclusive of Taxes. GST @ 18% Applicable.
- 2. Payment 50% Payment along with confirmed order and balance before delivery.
- 3. Transportation charges are extra at actuals.

Planters Care & Maintenance

Strictly use lightweight potting soil when planting to avoid damage such as bowing or cracking.

To maintain the best look to your planter, wash regularly and lightly wax the surface. Do not use aggressive cleaning agents or high-pressure water.

Use a washcloth and warm soapy water as needed. Avoid using materials which may scratch your planters such as steel wool or other abrasive sponges.

If you desire a glossy or high polish look you may also wax your planters. Ensure that your plant containers are very clean before applying an automotive wax to its surface.

It is very important to only use potting soil formulated for planters and container gardening. This is usually, but not always, a mixture of soil and peat but can vary according to mixture. To ensure you are using the correct type of potting soil for your plant(s), check with a professional to determine the correct regional and plant specific soil to be used.

Additionally, if you are using your planter outdoors it is necessary to drill sufficient drainage to allow excess water to drain from the planter. Drill a hole (minimum 8mm) into the base and elevate the container on small "feet." Improper installations and other forms of misuse may void the product warranty.

If you are using your planters indoors, drainage holes are not recommended. For more information contact us today.
