COMMERCIAL LANDSCAPING

Guru Integrated Services India Pvt Ltd is a notable name in the service sector of Chennai, India and licensed to provide a bouquet of services for commercial landscaping requirements. Whether you seek assistance for a complete site makeover of a property or enhancing a particular area, we can help you with the design service you need. A team of qualified landscape architects is entrusted to assess client's requirements, plan the job and execute it as per client's preferences and schedule.

PERGOLA

One of the biggest advantages of metal pergolas is that they require little maintenance. Aluminum won't rust. Steel is strong and can even be treated with a zinc coating to protect it from corrosion over time. Our metal pergola installation experts can guide you through the best options for your budget and style. Request an in-home consultation today to learn about metal pergola kits, patio covers, and how they fit into your home's decor. With options for different finishes and metallic shades, metal pergolas can give any outdoor space a sleek, contemporary, or even industrial look. Metal pergolas can also be powder coated to any color, whether they're aluminum pergolas or steel framed.

SUSTAINABLE LANDSCAPING

Sustainable landscapes are responsive to the environment, re-generative, and can actively contribute to the development of healthy communities. Sustainable landscapes sequester carbon, clean the air and water, increase energy efficiency, restore habitats, and create value through significant economic, social and, environmental benefits. Through this site, you will learn how landscape architects improve your world through projects ranging from the large-scale sustainable master plans and housing communities to small-scale green streets, parking lots, and private yards. You will also learn how landscape architects, planners, architects, engineers, horticulturalists, and others work in interdisciplinary teams to create innovative models that outline a path to sustainable future practice.

LANDSCAPE MAINTENANCE

We offer landscape maintenance services, horticulture maintenance services. Having a landscape maintenance division, we meet all the maintenance needs, whether it be a small courtyard planting, sprawling estate or a commercial property. The lawn care management and bed maintenance programs are absolutely customized for one's specific site. The essentials include:

- Landscape design, install and maintenance
- Garden clean up and maintenance services
- Designing and maintenance of indoor plants and containers.

VERTICAL GARDEN

The lack of vegetation in urbanized areas, as result of human establishments, directly affects the quality of life, from physical and aesthetical point of view. The construction of vertical gardens is recommended both in interiors and especially in the exterior of buildings. By applying these technologies, any kind of area can be used at its maximum capacity, obtaining esthetic valences, benefic for environment and human health. Even if the price of constructing and maintaining the vertical gardens is higher than a classical landscape it's compensated by the environmental benefits, raising the vegetation surfaces, with impact for reducing the pollution effect.

HARDSCAPE & SOFTSCAPE SERVICE

hardscaping and softscaping design are really just two different types of landscaping. In fact, it shouldn't really be thought of as hardscape vs. softscape design, but rather hardscape and softscape design – the best landscaping actually combines both. Hardscaping and softscaping should complement each other and create a nice balance. You need hardscape designs to make up the core of your landscaping, but remember, no landscape design is complete without the plants and flowers (softscaping)!

IRRIGATION SERVICE

Today, every property owner needs to think greener when it comes to water use around their property. Whether you own a home, business, commercial, or agricultural property, you are probably using too much water to keep your greenery happy. Drip irrigation is an intelligent method to cut back on water use without making your property's plants run dry by slowing and precisely dripping water directly to the root zone. At Guru Integrated Services, we offer drip irrigation services and systems to our customers. No matter your property and irrigation needs, we are certain that drip irrigation can help you control water usage.

WATER FEATURES

Adding a water feature to your home can instantly transform the landscape, making it an inviting and tranquil retreat to share with friends and family. Enhancing your backyard with a water feature will do more than add a soothing melody of running water to your outdoor soundtrack, it will also add value to your home. Whether you are interested in incorporating a pond or an ornate fountain, the professionals at Guru Integrated Services India Pvt Ltd will work with you to help bring your vision to life. Your water feature will seamlessly blend in with your existing landscape and architecture while adding a dazzling touch.

TERRACE GARDEN

The terrace garden is one of many ways to lead a healthier and greener life. And it is a great opportunity for people with bigger spaces. Not only small plants or flowers, but it is a great idea to grow fruits and vegetables on your rooftop as well. The best part of terrace gardening is that it can be completely covered in soil and grass to convert it into a lawn. After all, there can never be enough creativity and innovation done when it comes to gardening landscapes. Now, it is not difficult as you think it is. And if you are a first-timer, all you need are a few things to keep in mind before you start planting your favorite greens. Things like knowing the space, types of plants that will fit the best, the amount of sunlight exposure, if the proper shade is required in harsh and direct sunlight areas, and the list goes on. The best way to get a perfect terrace garden setup is to call in professional help. Because who else will know what could be planted better than professional gardeners themselves.

KITCHEN GARDEN

Kitchen gardening is one of the best ways to form healthy habits, save money, and relax. There are many gardeners and landscapers across the city that provide help you in growing your kitchen garden and provide regular maintaining services that make it easier to handle your kitchen garden. So get some seeds and start potting. Happy planting!

- You have the chance to eat healthy, fresh fruits, vegetables, and herbs that are higher in nutrients.
- Gardening helps in relaxing the mind, body, and releasing tension that comes with the routine of everyday life.
- Kitchen gardens add on to the interiors and are aesthetically pleasing.
- Growing your groceries are cost-efficient since you will save a lot of money at the grocery store.
